Backdrop

E-Learning has been around for almost two decades but its prominence peaked during the Covid-19 pandemic as a result of which it has emerged as an inextricable part of today's education. Consequently, the endeavour of all the teachers is to make e-learning more engaging, efficient, interactive & learner-centric. E-Course designing & development is a great way in this concern for promoting self-paced & asynchronous learning. They also facilitate the learners urge to update & gain knowledge & skills and curiosity to learn new things. These courses can be developed in any area of education & skill development.
