## Backdrop

Due to COVID-19 outbreak a number of challenges have been emerged in the educational area in general and teaching- learning process in particular. Assessment being an integral part of all educational processes, becomes a tough job especially when it has to be conducted by staying at home. The best way to address this challenge is going for anywhere - anytime assessment i.e. online assessment which not only helps in generating transparent reports on student's result but progress also. Thus, it becomes pertinent to know the development procedures of online assessment and their use & application in order to make assessment a meaningful, purposive and joyful exercise. In this backdrop, 3 days Online National Workshop has been organised with an intent to develop skills & competencies for designing, developing and delivering online assessment.
