### Backdrop

The current global educational scenario stresses on "Education to All" & "Quality Education to All". Open Educational Resources (OERs) plays an important role in providing a strong base to this thought process. In addition to be free, these resources can be accessed by anyone from anywhere & anytime and it is possible to reuse, retain, revise, remix & redistribute them. Consequent upon the availability of these resources in various forms viz. video, image, text, audio, info graphics etc. they are placed in the category of best learning materials which helps in providing newness, innovativeness & creativity in the working patterns of teaching, assessment & research. On account of having tremendous potential in providing number of opportunities for learner-centric, self-directed learning & self-learning, it becomes pertinent for each & every teacher to know, understand & use them.
